
PARTS BULLETIN

Original Issue Date: **2/04**

Models: **All**

Market: **All**

Subject: **Parts Catalog Index TP-5366 Discontinued**

Parts Catalog Index TP-5366 was designed to guide you to the parts catalogs associated with a given specification (spec) number. We have discontinued the printed TP-5366. A Microsoft Excel file replaces TP-5366, offering more benefits and flexibility.

Benefits. The database-type format facilitates updates and enables you to do powerful searches.

- Click the publication number link to automatically open the parts catalog (CD-ROM only).
- Search by spec number to find associated parts catalogs.
- Search by model number to find associated parts catalogs.
- Filter on a parts catalog number to determine specs and models covered by the publication.
- Filter by engine model to view a list of associated generator set models.

Location. Beginning in February 2004, you can find the Parts Catalog Index file in these locations:

- Service File CDs
- Service Parts and Literature Tools CD, TP-6100-CD
- The literature section of KOHLERnet (Service Parts and Literature Tools menu located at the bottom of the window)

Ordering. Each service file mailing includes either the Service Parts and Literature Tools CD (TP-6100-CD) or a Service File CD. Order additional copies of TP-6100-CD from the Kohler Power Systems Aftermarket Parts Department.
