REVISION DATE	1/76

### KITS AVAILABLE TO REPLACE DISCONTINUED TILLOTSON CARBURETOR ON L600 ENGINES

The Tillotson carburetor (Kohler #D-240460) has been discontinued and is no longer available as a complete assembly. Repair kit #240771 and individual parts are, however, still available for reconditioning this carburetor.

When replacement of the complete Tillotson carburetor is necessary, use kit #241536 on all except the Marine Generator sets--on the marine sets, use kit #241535. Both kits include a Kohler carburetor with carburetor mounted automatic choke plus all other necessary parts and instructions for making the conversion. The 241536 kit includes a dry air cleaner while the 241535 kit includes a flame arrestor.
