INTRODUCTION

All prices shown are f.o.b. factory, Kohler, Wisconsin, U.S.A. and are subject to change without notice. Prices in effect at time of shipment will apply. Any manufacturer's tax or sales tax will be added to these prices at the option of Kohler Co.

List prices shown are the basis for trade discounts and are not intended as resale prices.

Stocking Code:

- 1— To be stocked by dealers and distributors.
- 2— To be stocked by distributors.
- 3— To be stocked if warranted by local demand.
- 4— Slow moving part. To be stocked if warranted by local demand.
- 5— Very slow moving special part. Order only as needed. May not always be available.
- 6— Newly added parts with no usage history.

NOTE: If local demand warrants, part numbers with stock codes 3 or 4 should be stocked in addition to those indicated by stock codes 1 and 2.

Disposition Code:

- A— Relabel old part to new part number. Use stock; parts are interchangeable.
- B— Part is not to be used. Disposition of part has been previously issued— Nonreturnable.
- C— Use old part until stock is depleted, then order new part number. Do not fill orders for new part numbers with old part.
- D— Discontinued part— use stock. Not to be returned for credit— Nonreturnable.
- E— Nonreturnable.
- F— Life Time Buy Material— Nonreturnable except within six months of being designated stock code "F" in I.C. Bulletin.

Standard Package:

Although most service parts are available in standard packages of one, some parts are sold in packages of 5 or 10 pieces. Specification sheets are shipped in standard packages of 25 pieces. Sales brochures are shipped in standard packages of 50 pieces. Refer to the standard package column of your service parts price list, TP-5426. To order literature with a standard package of greater than one piece, order in multiples of the standard package. Order quantities of less than the standard package or a multiple thereof are rounded to the next highest multiple of the standard package.

For example, if you need 20 copies of a spec sheet with standard packages of 25 pieces, order 25 pieces. If you need 60 pieces of that spec sheet, order 75 pieces. If you order 40 copies, 50 copies will be shipped.

Priority Orders:

Priority orders are given special handling in that every effort will be made to ship priority orders the day they are received. All priority orders are to be entered by telephone and must ship via first class freight. A \$25 service fee will be assessed for priority orders shipped the same day. Priority orders must be for a specific repair and may be drop shipped.

Service Parts 1

Six-digit part numbers of format **L-NNNNNN-LL**. Where "L" represents alpha (letter) characters and "N" represents numeric digits. Not all part numbers contain alpha prefixes and/or suffixes. Primary order is by the six-digit base part number. Secondary order is by suffix. **Prefixes and suffixes must be used when ordering parts.**

This section includes some seven-digit part numbers of format NN NNN NN. Where "N" represents numeric digits. These are listed in numerical sequence as if part numbers contained no spaces. Seven-digit part numbers generally denote Kohler Engine components.

Most common hardware components contain the letter X as a prefix and are of the format **X-NNNN-NNN**. Where "N" represents numeric digits and indicates the maximum number of digits that will appear in the part number. The number of digits for the first set of "N" digits (this is the base part number and controls the sequence in the parts price list) can vary from one to four. The number of digits of the second set of "N" digits can vary from one to three. Examples of common hardware would be X-5-1, X-22-16, X-125-3, and X-6050-12.

A new part number series was implemented in April 1999. Part numbers follow the format "GM99999-XXX where GM is fixed, the 9s indicate a four- or five-digit numeric base component of the part number (used as the primary sort field), and the -XXX indicate an optional suffix. Some examples of suffixes follow: BLK=Black, K=Kit, A=assembled, and P=packed. Suffixes differentiate parts similar in size or color.

Literature 330

Format of publication part numbers is typically **LL-NNNN-LL** or **LNN-NNN**. Where "L" represents alpha (letter) characters and "N" represents numeric digits. The primary order is by the numeric digits after the first hyphen and secondary by the suffix digits after the second hyphen. Examples of typical publication numbers would be TP-5004, and G12-117. Publications with a zero "0" as the first digit after the hyphen will be listed without this character. For example, publication G12-014 would be listed in this Parts Price List as G12-14.

Dates appearing next to the publication number are not required when ordering, as the most current version will be sent. In most cases, publications with an earlier print date are not available.

Note that some publication descriptions contain abbreviations as follows:

O/M	Operator's Manual	M	= Marine
O/I/M	Operation/Installation Manual	P	= Portable
I/M	Installation Manual	R	= RV
P/C	Parts Catalog	S	= Standby
S/P	Service/Parts Manual		
S/S	Specification Sheet		
S/M	Service Manual
